👤 PROFILE

Python Backend Developer with 3.4 years of experience building scalable APIs and backend systems using Django, DRF, AWS, MySQL, and PostgreSQL. Skilled in performance optimization, asynchronous processing with Celery and Redis, and cloud deployments.

📁 WORK EXPERIENCE

Basava Pracheena Vaidya Anveshana Pvt Ltd

01/2023 – 04/2026 (Notice Completed)

Backend Developer

Bangalore, India

Tech Summary: Python, Django, Django REST Framework, MySQL, PostgreSQL, Celery, Redis, Docker, AWS (EC2, S3, CloudFront, Lambda, MediaConvert, EventBridge), Git, Linux, Swagger/OpenAPI, Razorpay Webhooks, Twilio

Part of a small, fast-paced startup engineering team, contributing to multiple active products (Nadiswara, BAA, Carehub) in parallel while owning backend architecture, deployments, performance optimization, and end-to-end feature delivery.

Tongue Analysis – Automated Diagnosis System (Jan 2023 – Jul 2023)

- Built backend APIs in Django & MySQL to process tongue images and symptoms
- Integrated ML outputs from AWS Sagemaker, ensuring smooth model-API interaction
- Improved API response time by ~20% through query optimization
- Supported deployment on EC2 & S3; used Bitbucket and Postman for workflow testing

Nadiswara – Real-Time Pulse Analysis & Health Tracking (Jul 2023 – Dec 2024)

- Designed backend architecture for real-time device streaming and patient report generation
- Implemented Celery + Redis pipelines, reducing report processing time by ~40%
- Built Razorpay webhook system for payments; automated OTP delivery using Twilio
- Generated accurate diagnostic PDFs using WeasyPrint; optimized API performance, reducing latency by 30–35%
- Containerized services on AWS EC2; improved system stability and uptime
- Involved in hardware R&D, validating device sensors and improving signal quality across 2000+ real patients

BAA eLearn App – Online Learning Platform (Jan 2025 – Apr 2026)

- Built core features: courses, enrollments, progress tracking, instructor analytics
- Integrated Razorpay payment flow with async verification, reducing payment issues by ~25%
- Implemented Celery + Redis queues, boosting background task throughput by ~40%
- Managed AWS MediaConvert, CloudFront & Lambda for video delivery, cutting load times by 50%
- Led junior developers, reviewed code, and ensured on-time delivery across modules

Carehub – Clinic & Patient Management System (Jul 2025 – Apr 2026)

- Developed consultation, history, healer management, and paid diagnosis modules
- Built efficient PostgreSQL-backed APIs and integrated Razorpay + Twilio flows
- Used OpenAI vector search to enhance patient record retrieval accuracy
- Deployed and monitored services on EC2/S3; assisted with CI/CD and junior mentoring

Chimera Technologies Pvt. Ltd

03/2022 – 10/2022 | Bengaluru, India

Software Engineering Trainee

- Developed a Java-based currency conversion microservice and a JavaScript weather app
- Gained experience in API testing, debugging, and frontend-backend integration

EDUCATION

Bachelor of Engineering (Information Science)

09/2017 – 08/2021

Nagarjuna College of Engineering and Technology

74.3%

SKILLS

Backend Development — Python, Django, Django REST Framework (DRF), REST API Design

Databases — MySQL, PostgreSQL, SQL Optimization

Cloud & DevOps — AWS (EC2, S3, CloudFront, Lambda, MediaConvert, EventBridge), Docker, CI/CD

Asynchronous Processing — Celery, Redis

API & Documentation — Swagger / OpenAPI, JSON

Tools & Version Control — Git, GitHub, Bitbucket, Linux

Other Skills — Authentication workflows, performance tuning, scalable backend architecture

LANGUAGES

English

Full Professional Proficiency

Kannada

Native or Bilingual Proficiency

Telugu

Native or Bilingual Proficiency

INTERESTS

- AI tools
- Video creation & editing
- AI image generation
- Backend system design
